Informed Consent Form

This interview is for educational purposes only and is being conducted as for DECO3500, a course about social and mobile computing in relation to our chosen domain area of t*echnology in education* looking at the problem area of *authentic learning technology for teachers that builds confidence in using technology in classrooms*. You will be asked a series of questions in regards to our domain area.

Consent is voluntary - you do not have to participate if you do not want to. If you do choose to participate, you may withdraw your consent at any point, all data that has been collected will be destroyed and not used for our research.

All data collected is confidential and will be kept in a secure location, and your data will be indexed by a participant ID rather than by name. Data will be shared amongst the team and teaching staff involved in DECO3500. The data collected will not be accessible to the public in any way. Data collected will be used to assist us in determining the requirements for our project and understand our chosen problem space.

All your data, including any recordings, will be erased/destroyed once class grades are released. Any changes to the above, regarding data collected on your testing session, you will be notified by email.

I have read the information above and give my consent to participate.
