# Authentic Education

- An approach not a method

Reserachers show that teachers cannot perform some experiments because they are costly and hazardous to be performed in classroom (Lombardi). The solution for that is use if technology. This phenomenon directs us to the problems space

Problem Space

The use of technology in classroom is a hurdle for teachers to deliver scientific concepts

A Authentic Content

B Authentic Assessment

C Authentic Tools

E-Learning

A paradigm of education that integrates the education with technology tools

Solution Part - I

Using the e-learning tools to implement the *Authentic Principles* of education, these tools might include computer applications, mobiles and tablets and immersive technology instruments.

" .... a good e-learning module of traning setup can be a useful thing for teachers who are not much inclined to use technology in classroom due to the lack of experience ..... "

Dr Marie Boden

Immersive Technologies

The project is based on the premises that integration of scientific conscepts with immersive technology such as VR can help in application of authentic learning.

Solution Part - II

Authentic Education

E-learning Tools

Immersive Education
